Capstone Foundation: Claude Code Build Prompt

Nov 5, 2026 · @ASPIRE

Copy everything below this line into Claude Code, in a new project folder that holds the two logo files and any photos you have.

Goal and ground rules

You are building the website for **Capstone Foundation**, a Christian charity that helps widows and orphans in Enugu and Abuja, Nigeria. Build a simple, very beautiful, fast, mobile-first site. It will gain a donation back end later, **once the payment gateway is chosen. It will first be published on Render under a temporary address, and the domain capstonefoundation.net will be connected afterwards**. All content you need is in this prompt.

Ground rules

- Use only the facts in this prompt. Never invent statistics, names, dates, addresses, quotes, testimonials, partners or Scripture. If something is missing, use the placeholder system below.
- Voice: inspirational, hopeful, openly Christian. Short sentences, plain words. Always "we", never "the foundation says". Scripture is an invitation, not a hammer.
- Privacy: never publish money amounts, receipts, bank screenshots, diagnoses, case details or children's surnames. Young people appear by first name only.
- Do not build the payment back end, database, user accounts or payment gateway yet. Do prepare for them as described under Donation back end (phase 2) in the stack section.
- If you need anything that is not covered here, ask me before adding it.

Placeholder system. Create `src/config/site.ts` as the single source of truth for contact details, social links and these flags, all `false` or `null` for now: `showFounding`, `showTrustees`, `showRegistration`, `showAddress`, `bankDetails`, `sportProgramUrl`. Any section that depends on a missing item is hidden while its flag is off, with a `TODO` comment where it will go. The one exception is the Donate page, which shows a clearly styled "Account details coming soon" card until `bankDetails` is filled in.

Stack and structure

- **Stack:** Node.js 20+, Astro with static output, TypeScript, Tailwind CSS v4. The blog is an MDX content collection at `src/content/stories`.
- **Font:** Inter, self-hosted with `@fontsource-variable/inter`.
- **Routes:** `/`, `/about`, `/programs`, `/programs/widows-empowerment`, `/programs/scholarships`, `/programs/healthcare`, `/programs/sport-development`, `/get-involved`, `/donate`, `/stories`, `/stories/[slug]`, `/contact`, and a 404 page.
- **Components:** Header, Footer, Hero, Band (alternating white and #F7F7F7), MediaBlock, ProgramCard, StatStrip, Testimonial, CtaBand, PlaceholderCard, Seo.
- **Forms:** no form back end. "Volunteer" and "Partner" use `mailto:` links and a WhatsApp link (`https://wa.me/2348081748550`).
- **Donation later:** `see Donation back end (phase 2) below`.

SEO and technical

- Unique title and meta description per page, canonical URLs on `https://capstonefoundation.net`, Open Graph and Twitter tags, `sitemap.xml`, `robots.txt`, and an RSS feed for stories.
- JSON-LD `Organization` data (name, logo, contact, `sameAs` social links) on every page.
- Include "Nigeria", "Enugu" or "Abuja" naturally in titles and headings. Several other organisations use the name Capstone Foundation, so always make the location clear.
- Semantic HTML, descriptive alt text, optimised images through `astro:assets`, and no layout shift.

Quality bar

- Lighthouse 95 or higher on mobile for performance, accessibility, best practices and SEO.
- WCAG AA contrast, full keyboard navigation, and a layout that works at 360px wide.
- Respect `prefers-reduced-motion`. All content must work without JavaScript.
- Static output, deployed as a Render Static Site (see Hosting on Render below). Add a README with the install, dev and build commands.

Hosting on Render (temporary address first)

- Publish as a Render **Static Site** from the Git repository. Build command `npm install && npm run build`, publish directory `dist`. Add a `render.yaml` blueprint for it.

- Until the domain is connected, the site lives at its `onrender.com` address. Read the site URL from `PUBLIC_SITE_URL` and use it for canonical links, the sitemap, Open Graph tags and JSON-LD, so switching to `https://capstonefoundation.net` is a one-line change.
- Add `PUBLIC_INDEXABLE`, set to `false` for now. While it is `false`, every page gets `noindex` and `robots.txt` disallows everything, so the temporary address does not compete with the real domain in Google. I will switch it to `true` when the domain goes live.
- When I buy the domain on Cloudflare, I will add it as a custom domain in Render and point the DNS records at Render, with the Cloudflare proxy off (DNS only). Write these steps into the README.

Donation back end (phase 2, do not build yet)

A payment gateway such as Paystack or Flutterwave needs a back end. The secret key must never be in the website, and a server must create each payment, confirm it through the gateway's webhook, and record it for receipts. So prepare for it:

- Keep the site static. Put the future API in a separate `server/` folder (Node and TypeScript, Fastify or Express), to be deployed later as its own Render Web Service with a Render Postgres database. For now, add only a README there that describes the plan. No code.
- Plan these endpoints: `POST /api/donations/initialize`, a webhook endpoint with signature checking, `GET /api/donations/:reference` for the thank-you page, and an admin-only list of donations.
- The `DonationPanel` component reads `PUBLIC_API_URL`. While it is empty, it shows the bank-details card. When it is set, it shows a gift form (amount, name, email) that calls the API and sends the donor to the gateway's checkout.
- Gateway keys live only in Render environment variables, never in the repository.

Design system

The feel is editorial and restrained, like a well-made annual report: the page speaks through scale, white space and photography, not decoration. It is based on the Refero style summary of airbnb.org (https://styles.refero.design/style/194faa2f-2f69-4bbf-9e29-290f28fa8ca2). Copy the system only. Do not use Airbnb's logo, wordmark, copy, photos or font.

Colour tokens (define as CSS variables and in the Tailwind v4 `@theme`)

Token	Hex	Use
ink	#222222	Text, headings, nav, footer
paper	#FFFFFF	Page background
band	#F7F7F7	Alternate sections
pebble	#EBEBEB	Dividers and hairlines
fog	#6A6A6A	Secondary text
ash	#A6A6A6	Muted UI, disabled states
brand	#0B8B68	Logo green: large buttons, highlights, big numbers
brand-deep	#08694F	Links, small text, button hover

White text on #0B8B68 has a contrast of about 4.3:1, so use it only at 19px bold or larger. For links and small coloured text, use brand-deep.

Type. Inter only. Body 18px, weight 400, line-height 1.56, maximum width 640px. Headings weight 700, centred, with tight tracking.

Role	Desktop	Mobile	Tracking
Display (hero)	72px / 1.13	40px	-0.03em
H2	48px / 1.18	32px	-0.02em
H3	26px / 1.29	22px	-0.01em
Caption	14px / 1.43	14px	0

Use `clamp()` for fluid sizes.

Layout and components

- Maximum content width 1200px. Base spacing unit 8px. Section padding 64px (96px for the hero).
- Alternate sections between paper and band. Hero and section headings are centred.
- Completely flat: no shadows, no gradients, no glows. Depth comes from surface contrast and 1px #EBEBEB hairlines.
- Radius: buttons and links 8px, cards and images 12px. Nothing rounder.

- **Primary button:** background #0B8B68, white text, 19px bold, padding 14px 28px, 8px radius, hover #08694F. **Secondary button:** transparent, 1px ink border, ink text.
- **Card:** paper background, 1px pebble border, 12px radius, 24px padding.
- Header: logo on the left, two or three text links, and a Donate button on the right. It does not need to be sticky.
- Motion: fade and translate of 200ms or less on scroll, off when `prefers-reduced-motion` is set.

Changes from the reference style

1. The reference allows no colour except its logo. Here the single accent is the Capstone green, used sparingly.
2. The reference hero is text only. Here the hero is centred text, then a large photo block directly beneath it.
3. Programs appear as a flat four-up card grid that collapses to one column on mobile.
4. Never place text over a photo unless it sits on a solid scrim or inside a card.

Logo. Two files are in the project: green on white and white on green (960 x 540 JPG). Copy them to `public/brand/` as `capstone-logo-green-on-white.jpg` and `capstone-logo-white-on-green.jpg`. Use the green-on-white version in the header and on light sections, and the white-on-green version in the footer or any green band. Crop the pyramid emblem for the favicon. I will supply an SVG or transparent PNG later, so keep the logo in one component.

Imagery. Documentary, natural light, candid. People appear only in photos I have consent for. Real photos always come first.

Where images come from, in this order

1. **My own photos.** Some are in my Google Drive, which you cannot read directly. I will download the ones I approve and put them in `images-incoming/` at the repository root (git-ignored). If a Google Drive connector happens to be available in your session, you may list my files, but copy nothing into the site until I confirm which ones.
2. **Unsplash, only if needed.** Use it for atmosphere images with no people in them (a landscape, a sunrise, an open Bible, fabric, bread, a building). Never use Unsplash to show widows, orphans, teenagers or any scene that could be taken for Capstone's own work. My access key is in `.env` as `UNSPLASH_ACCESS_KEY`. Keep it out of the repository and out of the browser: use it only in a local script, `scripts/fetch-`

`unsplash.mjs`. Follow the Unsplash API guidelines: use the image URLs the API returns, trigger its download endpoint when a photo is chosen, and credit the photographer and Unsplash, with links, in a "Photo credits" line in the footer.

3. **Placeholders.** Until a slot is filled, show a flat #EBEBEB block with the caption "Photo to come".

Image pipeline

- Write `scripts/process-images.mjs` using `sharp`. It resizes to at most 2000px on the long side, converts to AVIF and WebP, strips all EXIF metadata including GPS location, writes to `src/assets/images/`, and records each image in `src/data/images.ts` (id, alt text, caption, page and slot, credit).
- Skip and report anything that looks like a receipt, bank screenshot, ID, chat screenshot, medical document or school-fee slip, and anything showing an account number. Those never go on the site.
- Look at each photo and write alt text that describes only what is visible. Add no names or surnames unless I give them.
- Then propose a slot map (home hero, About, one per program page, Get involved) and wait for my approval before placing anything.
- Do not commit videos. If I want one used, ask me; the plan is to host it on YouTube or Vimeo and embed it.

Pages and exact copy

Use this copy word for word. Where a page says "hidden", build it behind its config flag.

Home

1. **Hero.** H1: "A firm foundation for widows and orphans." Subtext: "Capstone Foundation is a Christian charity helping widows and orphans in Enugu and Abuja rebuild their lives with practical support, skills and prayerful care." Buttons: **Donate** (primary, to `/donate`) and **See our programs** (secondary).
2. **Large photo block** under the hero.
3. **Who we are** (band): "Every life stands on a foundation, and loss can shake it overnight. Capstone Foundation is a Christian charity that helps widows and orphans rebuild theirs. We support and empower them to build a better standard of life, and through every act of care we point them to Christ, who is a firm foundation."
4. **Programs:** four cards linking to the program pages (copy below).

5. **Impact strip** with these four figures: "2 cities: Enugu and Abuja", "20+ widows in our forum", "3 scholarship students", "Meetings twice a month".
6. **Testimonials** (copy below).
7. **Faith band:** the quote "Father of the fatherless and protector of widows" with the reference Psalm 68:5, followed by the Why faith text from the About page.
8. **Call to action:** "Stand with us." with Donate and Get involved buttons.

About

- **Who we are:** as on the home page.
- **Where we work:** "We work in Enugu and Abuja, with programs running in both cities."
- **Who we serve:** "We serve widows and orphans among the less privileged, and we reach teenagers through mentorship, counselling and sport."
- **What we do:** "We stand with widows and orphans in the practical things that shape their future." Then four points. *Widows Empowerment:* "Through the Voice of the Widows Forum, we gather widows to pray and grow together, and we empower them with skills and business support so they can provide for their families." *Scholarships:* "We sponsor school fees and vocational training for orphans and teenagers with the will to learn." *Healthcare support:* "We step in with medical help for those who cannot afford treatment." *Sport Development Program:* "We reach teenagers through sport, then walk with them through mentorship, counselling and skills." Close with: "Every program is rooted in prayer and care for the whole person."
- **How we choose who to help:** "People reach us in two ways: they come to us with a need, or we find them through our outreaches and home visits. Every case is assessed for how serious and how urgent it is before we act, so that help goes where it is needed most and the quietest voice is not overlooked." Then: "For scholarships and healthcare, the applicant records a short video explaining their situation, and for scholarships we also ask for the child's school results. We review each application with care, then look for the funding to meet the need."
- **Why faith:** "We serve because of Christ. Scripture calls God the 'Father of the fatherless and protector of widows' (Psalm 68:5) and tells us to visit orphans and widows in their affliction (James 1:27). We believe love is best seen in action, so every act of help we give is also an invitation to know Christ more closely. We do this work with prayer, honesty and respect for every person we meet."
- **Mission:** "To support and empower widows and orphans with practical help, training and prayerful care, so they can live with dignity, hope and the means to provide for themselves, and to draw them closer to God through works of charity."

- **Vision:** "A society where every widow and orphan lives with dignity and hope, standing on a firm foundation of faith, education and the means to provide for themselves."
- **Values:** Faith: "We serve in the name of Christ and say so plainly." Compassion: "We go to people where they are, and listen before we help." Dignity: "Help should leave a person's honour intact: a gift and a next step, not a handout." Integrity: "Every naira is accounted for, and we report openly to those who give." Empowerment: "We aim for independence through skills, savings and school, not dependence." Presence: "Follow-up matters more than programmes. We keep showing up."
- Hidden until supplied: founding story (`showFounding`), trustees (`showTrustees`), registration number (`showRegistration`).

Programs

An overview page with four cards, then one page per program.

- **Widows Empowerment (Voice of the Widows Forum).** "The Voice of the Widows (VOW) Forum gathers widows for prayer, fellowship and care, and helps them build a livelihood." Facts: started in early 2026; more than 20 widows; meets twice a month in Abuja; reaches widows in other states online; more than half of members have received support; one widow was set up in a grinding-machine business this year. "Skills training in tailoring, baking and catering is planned for next year."
- **Scholarships.** "School-fees sponsorship and vocational training for orphans and teenagers." Facts: 3 students sponsored; young people are also learning vocational skills. How to apply: "The applicant records a short video explaining their situation and shares the child's school results. We assess the application and look for funding." Use first names only if a student is named.
- **Healthcare support.** "Help with medical costs for those who cannot afford treatment. Each case is assessed for seriousness and urgency, and the applicant records a short video explaining their need." No case details, ever.
- **Sport Development Program.** "Soccer and basketball for teenagers, with mentorship, counselling and skills. Sessions run in person, with mentoring and learning online. Launching soon, backed by Capstone Foundation." No prices. If `sportProgramUrl` is set, add a "Visit the program site" button.

Get involved

Four blocks. **Give:** link to `/donate`. **Volunteer:** "Share your time and skills with us." Button: email. **Partner:** "Work with us as a church, business or organisation." Button: email. **Pray:** "Our work begins and ends in prayer. Keep widows, orphans and our teams in yours."

Donate

Headline: "Help us build a firm foundation." Body: "Your gift supports our work with widows, orphans and teenagers: school fees and vocational training, medical help, and skills and business support for widows." Then the account card. Until `bankDetails` is set, show "Account details coming soon" with: "To give now, call 08081748550 or email reachcapstonefoundation@gmail.com." When set, show account name, number and bank with a copy-to-clipboard button. The trustees have approved showing these publicly.

Contact

Phone 08081748550 (with a WhatsApp link), email reachcapstonefoundation@gmail.com, and social links to @capstonesdp on Facebook, Instagram and TikTok. Keep the URLs in config `: facebook.com/capstonesdp, instagram.com/capstonesdp and tiktok.com/@capstonesdp`. The office address is hidden (`showAddress`).

Testimonials

1. "Thank you so much. May Almighty God continue to bless you people abundantly, in Jesus' name." Attribution: Maryann Anenechi, mother of Favor, scholarship beneficiary. She has agreed to be quoted.
2. "Mrs Veronica Okon, a member of the Voice of the Widows Forum, testified at our October meeting that she was healed of leg pain after prayer and has had no pain since." She has given consent.

Build the Testimonial component so more can be added from a data file.

Stories (blog)

Build the index, post template, tags and RSS. Seed the collection with these titles as `draft: true` stubs with front matter only: "What James 1:27 means for how the church treats widows and orphans"; "Bible verses about caring for widows and orphans"; "How to start a widows' ministry in your church in Nigeria"; "How to support a grieving widow: practical and spiritual"; "International Widows' Day (23 June): what widows in Nigeria

face"; "How we choose who to help: our video application and assessment process"; "Why mentorship and counselling matter for Nigerian teenagers"; "How to sponsor a child's school fees in Nigeria safely". Do not publish drafts.

Working method and acceptance

How to work

1. Before writing code, reply with the file tree, the component list and any questions. Wait for my approval.
2. Then build in this order: scaffold and config, design tokens and layout, Home, About, Programs, Get involved, Donate and Contact, Stories, SEO and structured data, final checks.
3. After each step, run the build and tell me in two or three sentences what is done and what is next.

Done means

- [ ] Every page in the route list exists and uses the copy above, word for word.
- [ ] No invented facts, no amounts, no children's surnames, no diagnoses.
- [ ] Hidden sections (founding story, trustees, registration, address, bank details) are controlled only by `src/config/site.ts`.
- [ ] The design matches the tokens above: flat, centred headings, 12px and 8px radii, green used sparingly.
- [ ] Lighthouse 95 or higher on mobile for all four categories, checked on the built site.
- [ ] Looks right at 360px, 768px and 1280px wide.
- [ ] Sitemap, robots, RSS, canonical tags, Open Graph tags and JSON-LD are present.
- [ ] A README explains how to edit copy, add a testimonial, add a story, turn on a hidden section and connect the domain. A `render.yaml` exists, and `PUBLIC_SITE_URL` and `PUBLIC_INDEXABLE` work as described.

What I will supply later: an SVG or transparent PNG logo, photos (with consent, in the incoming folder), the bank account details, the founding story and trustees, the CAC number, the office address, and more testimonials.
